Technical Assistant (f/m/d) – Molecular Biology

Location:

Vienna

Working Hours:

Full-time employee

Area:

Sabine Taschner-Mandl Group

Salary:

min. € 3.390.-

Contact:

vanessa.kuehl@ccri.at

Application Deadline:

15.09.2026

Do you enjoy combining lab work with organization and innovation? Here is your chance to contribute to science that makes a difference!

We are looking for a Technical Assistant (f/m/d) with a strong background in molecular biology. This is a technically broad and demanding role: you will work across cell culture, CRISPR screens, molecular cloning, and NGS library preparation - all in the context of cutting-edge pediatric cancer research using patient-derived samples. If you thrive in a well-equipped lab, enjoy learning new techniques, and want your work to contribute directly to cancer research, this position is for you.

Your responsibilities

- Perform and maintain cell culture work (including patient-derived cell lines and iPSCs)
- Conduct CRISPR screens and CRISPR editing
- Plasmid cloning and lentiviral plasmid packaging
- Generate NGS libraries from patient samples (bulk and single-cell-seq)
- Ensure accurate documentation of experiments and contribute to structured lab organization and workflow optimization

Your profile

What you bring for this position:

- MSc or PhD in molecular biology, biochemistry, or a related field (completed or close to completion)
- Proven experience in mammalian cell culture
- Experience with CRISPR/CRISPRi/a and/or NGS library preparation is a strong advantage
- Previous experience in a research laboratory (e.g. research assistant, lab technician) is beneficial
- Structured, proactive working style with strong organizational skills
- High level of reliability and ability to work both independently and collaboratively
- Excellent English communication skills (written and spoken); German is not required

Our offer

State-of-the-Art Facilities: Benefit from access to infrastructure that supports your research and daily work

Translational Research: Work directly with patient-derived tumor samples and in vitro models in a group that bridges wet-lab and computational science

Inclusive & Purpose-Driven: Be part of an international workplace with a meaningful mission

Collaborative Spirit: Join a young, motivated team that values open exchange, creativity and initiative

Flexibility that fits your life: Benefit from flexible working hours, home office options and additional days off

Prime Location: Work in the heart of Vienna – a European hub for biomedical research and a city known for its high quality of life

A fair and attractive salary package starting at € 3.390,-- gross (14x per year) on full-time basis with a view to increase based on your qualification and experience

Who we are

One of Europe's leading institutions in the field of pediatric oncology, St. Anna Children's Cancer Research Institute (St. Anna CCRI) investigates the biological foundations of cancer in children and adolescents. For almost 40 years, our multidisciplinary teams have been committed to developing innovative diagnostic approaches and personalized treatments aimed at further improving young patients' chances of cure. In close collaboration with both national and international partners we combine scientific excellence with clinical relevance. We stand for responsible research, transparency and sustainable knowledge building. As an employer, we offer a state-of-the-art research environment, opportunities for professional development as well as a workplace culture that embraces diversity and appreciation. Work where it really matters and contribute to science that makes a difference.

St. Anna CCRI is an equal opportunity employer. We value diversity and are committed to providing a work environment of mutual respect to everyone without regard to race, colour, religion, national origin, age, gender identity or expression, disability, or any other characteristic protected by applicable laws, regulations and ordinances.
